

New Rates & Prepaid Treatment Plans

To help you make a commitment to your health & wellbeing, we are offering significantly reduced rates for those who pay in advance for a set of treatments.

Starting July 1st private (uninsured) acupuncture treatments will be \$75, with discounts of 15-25% for prepaid plans, bringing the rates as low as \$56.25. Tinctures will be \$35/4oz., \$65/8oz. However with prepaid plan discounts and bottle rebates they will be \$30/4oz. & \$57/8oz.

Prepaid plans:

6 visits – 15% off acupuncture treatments

12 visits – 20% off acupuncture treatments

18 visits – 25% off acupuncture treatments

Plus 10% off custom herbal prescriptions & other services during the length of the plan.

Each treatment plan agreement is tailored to the individual patient. The **frequency of visits** in the agreement is a best estimation of what would be a good course of treatment. This may be modified as needed.

All appointments are scheduled in advance when the agreement is signed. This reserves your spot in the schedule. (This is one of the advantages of your prepaid plan - the schedule does fill up.)

Appointment changes/cancellations should be made at least **one full business day** in advance. (Not on a weekend or holiday!) If you do not give us at least this much notice, your treatment is forfeited. (You may come in earlier than scheduled without giving the full business day notice.)

All funds for prepaid plans are kept in a **special savings account** for this purpose. As the treatments are fulfilled, the full rate of each service is transferred out of this account into our regular account.

Prepaid plans are for one individual and are **non-transferrable**.

Prepaid treatment plans **expire** one year from the agreement date. If you do not use them within the year, it will be treated as a cancelled plan, and a refund will be calculated as outlined below.

You may **cancel your plan** before you have used all of your prepaid treatments and receive a refund of the balance after all services are charged at the current full rate. Example:

6 Treatments Prepaid	(Regular rate 6 x \$75 = \$450)
Prepaid Plan:	\$450 x 85% = \$382.50
Received 4 treatments:	4 x \$75 = \$300.00
Refund:	\$ 82.50
